

AGREE-Type Combined Temperature / Vibration Chambers

The EV Series AGREE style chambers are offered in various sizes and accommodate electro-dynamic, HALT/HASS mechanical vibration systems or roll-in product carts. The EV Series offers flexibility to be used as a test chamber with or without vibration tables.

Features:

- Engineered to adapt to all vibration tables in the market.
- Dual door design available for easy loading/unloading
- Gantry and Cantilever styles available for greater testing flexibility
- Easy access side panels
- Multiple door options available

Performances are based on laboratory conditions at +24°C, 60 Hz, with cooling water inlet temperature and flow rate according to requirements.

Performances at 50 Hz may vary. Please consult with your local Sales Representative if your conditions vary.

Temperature ramp rates are average, not linear rates of change.

¹ Heating and cooling rates between +85°C and -40°C in an empty chamber; measured at the supply air

² Temperature range is limited if export license is not granted, please consult with your local sales representative
